Precision*

New Members 2025–2026

Principal Members

"Google is proud to support the OpenROAD Initiative's mission to scale this open infrastructure for the next generation of developers."

Drew Wingard

Director of Silicon Infrastructure, Tools and Methodology

Contributing Members

"Antmicro is excited to support the OpenROAD Initiative in order to enable unprecedented, open innovation in silicon design."

Michael Gielda

VP Business Development

Sustaining Members

Sustaining corporate partners drive long-term growth and ecosystem continuity.

Public Funding

NSF AWARD

NSF POSE Phase II Project

The OpenROAD Initiative (ORI) is currently executing a 2-year project (*Sep 2025- Aug 2027*) aimed at transitioning the OpenROAD ecosystem into a fully self-sustaining open source ecosystem.

\$1.4M

Total National Science Foundation Funding

Led by Andrew B Kahng at UCSD

STRATEGIC GOALS

Pathways to Self-Sustainability

The POSE program provides the vehicle for building a durable and neutral governance structure:

- **Robust Infrastructure:** Fully funded CI/CD systems that give definitive yes no/answers on quality.
- **Giving Users a Voice:** In person interviews with users on pain points and required features.
- **Growing Enterprise Participation:** Engaging new organizations aligned with ORI open source charter.
- **AI Integration:** Ensuring OpenROAD integrates well with new user workflows, like agents.

Governance & Continuity Update

Community Inquiry

“With Siemens acquiring Precision Innovations, how does this affect OpenROAD going forward? Does governance or license status change?”

— OpenROAD User Community

Strategic Position

- 01 **Neutral Governance:** The OpenROAD Initiative remains the sole owner and steward of the repository, ensuring neutral governance.
- 02 **Strong Backing:** Core board members, including **Google**, continue to fully champion the open source roadmap.
- 03 **Protected Structure:** Board structure prevents unilateral changes to licensing or governance.
